

CS321 - Assignment 1

This assignment is to make you all conversant with Assembly level programming.

Problem Statement:

Familiarize yourself with the kit by writing programs for addition, subtraction, multiplication & division of two numbers (8 & 16-bit numbers). Using these programs, write a program for a calculator capable of the above operations viz. Addition, Subtraction, Multiplication & division (at least).

Any other innovation apart from the above problem statement (see features of a typical scientific calculator) will fetch you extra incentive marks.

Deadline:

Aug 6th 2019, 9:00am

The evaluation will be during the lab hours on Aug 6th 2019 (Tuesday)
